

Health Alliance Medical Plans Individual & Small Group Formulary

December 1, 2025

For the most current list of covered medications or if you have questions, call the Customer Service number on your ID card, view the electronic version of this formulary by visiting https://HealthAlliance.org/Pharmacy and clicking on the "View PDF" Link under "Individual and Small Group Plan Formularies", or log in at HealthAlliance.org. This formulary is subject to change, and all previous versions of the formulary are no longer in effect.

This formulary applies to all Health Alliance Individual & Family Plans and Small Group Plans, including HMO, POS and PPO products.

Plan-specific coverage documents, including the specific cost sharing applicable to drugs on this formulary and other services covered by your health plan can be viewed by logging in at HealthAlliance.org. To view the plan-specific documents without an account, visit https://www.healthalliance.org/documents/2317/2025 for individual and family plans sold directly through Health Alliance, https:/health-alliance.healthsherpa.com for individual plans available through the Marketplace, or https://healthalliance.org/plans/small-group for Small Group plans.

You can also access your formulary and other benefits and coverage information by logging in at HealthAlliance.org. After logging in, you can also:

- Locate a participating retail pharmacy by ZIP code.
- Look up possible lower-cost medication alternatives.
- Compare medication pricing and options.

A customer solutions representative can help you with information concerning drugs covered under your medical benefit, the actual dollar amounts of your cost sharing under your plan including information about your deductible, copayment, coinsurance, or maximum out-of-pocket limitations, the process for submitting an exception request and requesting prior authorization and step therapy exceptions and more.

What is a formulary?

A formulary is a list of prescribed medications chosen by your plan for their safety, cost, and effectiveness. Medications are listed by categories or classes and are placed into cost levels known as tiers. The formulary includes both brand-name and generic prescription medications approved by the U.S. Food and Drug Administration (FDA).

How do I use my formulary?

You and your doctor can consult the formulary to help you select the most cost-effective prescription medications. This guide tells you if a medication is generic or brand name, and if special rules apply. Bring this list with you when you see your doctor. If you have questions on how your medication is covered, call the Customer Service number on the back of your ID card or visit HealthAlliance.org/Pharmacy

About this formulary

Where differences exist between this formulary and your benefit plan documents, the benefit plan documents rule. This may not be a complete list of medications, and not all medications listed may be covered by your plan.

Please look at the benefit plan documents provided by your employer or plan sponsor for full details.

This formulary is updated monthly. All previous versions of the formulary are no longer in effect.

You can find out if your medication is listed in the formulary and if it is covered by the plan by using the alphabetical index by its brand or generic name, or by using the Category list.

The index at the end of the formulary lists the names of drugs by both generic and brand name, in alphabetical order. Once you find the drug name, go to the page number listed to locate the coverage information.

Category List: Drugs are grouped into AHFS therapeutic categories, which are listed under the Table of Contents in the formulary. If you know what category your medication is in, refer to the Table of Contents to find the page. A drug is listed alphabetically by its brand and generic name in the therapeutic category to which it belongs. If a generic equivalent for a brand name is not available on the market or is not covered, the generic drug will not be listed separately. The presence of a drug on the formulary does not guarantee that your doctor will prescribe the drug for a particular medical condition.

What are tiers?

Tiers are the different cost levels you pay for a medication. Generally, the higher your medication's tier, the more you'll pay out of pocket for it.

When does the formulary change?

The formulary is updated with changes monthly. All previous versions of the formulary are no longer in effect.

Positive formulary changes:

- New drugs or dosage forms may be added to the formulary at any time.

- Medications may move to a lower tier at any time.
- Utilization requirements may be removed from a drug at any time.

Negative formulary changes:

- Medications may move to a higher tier.
- Medications may be excluded from coverage.
- Medications may have changes in utilization management requirements.

Negative formulary changes usually occur on January 1 or July 1, however changes on other dates may occur.

In all cases, if you are currently taking a medication that will undergo a negative change, we will notify you and your provider 60 days before the negative change becomes effective. This notice will include (A) change in drug or dosage form; (B) changes in tier placement of a drug that results in an increase in cost sharing; and (C) any changes of utilization management restrictions, including any additions of these restrictions.

Notification of negative changes will also be posted on our website 60 days before the change occurs.

Drugs covered under the medical benefit

Drugs on the formulary labeled as Specialty Medical or General Medical are products that require administration or observation by medical personnel. These drugs and products are covered under your medical benefit when prescribed by a participating network provider and they are administered to you at a participating facility. Many Specialty Medical drugs require prior authorization. For instructions on how to obtain prior authorization, refer to the section **How do I request a prior authorization?** below. Please refer to your policy document for further information.

Why are some medications excluded from coverage?

A medication may be excluded from coverage under your pharmacy benefit when it works the same as or similar to another prescription or over-the-counter (OTC) medication.

How do I request a non-formulary exception?

Health Alliance will cover non-formulary drugs when medically necessary. This coverage is required by law. To request a non-formulary coverage exception, please call the customer service number on your member ID card or have your doctor submit an exception request to Health Alliance. Once we receive all the needed supporting information, we will approve or deny the exception request based on medical necessity. You and your provider will be notified of the coverage determination within 24 hours for urgent or exigent requests, or within 72 hours for all other requests. If a non-urgent request is approved, it will continue to be covered for the length of the prescription, including refills. If an urgent request is approved based on exigent circumstances, it will continue to be covered for the length of the exigency period. OR If a request is approved, coverage will continue for 12 months following the date of approval or until renewal of your plan.

If a drug is removed from the formulary or a negative change is made to its cost-sharing tier, we will notify you at least 60 days before making the change and provide notification of the change on our website. Our notification to you and your provider will include information on the specific drugs

involved and the steps your provider may take to request coverage determinations and exceptions, including a one-page form by which the prescribing provider can notify the health care plan in writing or via the provider portal that coverage of the drug is medically necessary. If your provider certifies that the drug is medically necessary, continuing coverage will be authorized for the drug and no changes will be made to current coverage related to the drug tier or its out-of-pocket costs.

What if I don't agree with a decision about a denied medication?

If an exception request is denied, you (or your authorized representative) and your doctor can file an appeal or grievance with Health Alliance or the Department of Insurance by calling the Customer Service number on the back of your ID card. Your denial letter as well as your coverage documents provide information on your internal appeal and external review rights and procedures.

What diabetic supplies are covered?

Coverage is provided for the following supplies when medically necessary and prescribed by your provider. Coverage for the following items shall be subject to deductible, co-payment and co-insurance provisions provided for under the policy or a durable medical equipment rider to the policy.

- Blood glucose monitors
- Blood glucose monitors for the legally blind
- Cartridges for the legally blind
- Lancets and lancing devices
- Insulin
- Test strips for glucose monitors
- Syringes and needles
  FDA-approved oral agents used to control blood sugar
- Glucagon emergency kits

Are contraceptives covered?

Prescription and over-the-counter contraceptive drugs, devices, and other products approved by the United States Food and Drug Administration are covered without cost-sharing. If one or more equivalent versions of a contraceptive product are available (for example, a brand and generic version of the drug), only one version of the drug will be covered with no cost-sharing. If an FDA-approved contraceptive product is not covered but your provider determines it to be appropriate based on medical necessity for your particular circumstances, it will be covered without cost-sharing. You may obtain a full 12-month supply of a contraceptive product at one time.

Coverage for abortion medications

Includes medications that are obtained with a prescription and used to terminate a pregnancy regardless of whether there is proof of a pregnancy. Coverage will not have any cost-sharing or treatment limitations that are greater than what is required for other pregnancy-related benefits that are covered by your policy.

Cost sharing for prescription insulin drugs

The total amount that you will be required to pay for a 30-day supply of covered prescription insulin will not exceed $35, regardless of the quantity or type of covered prescription insulin drug. If your usual copay for an insulin product is less than $35, you will pay your usual copay.

Coverage for abortifacients, hormonal therapy for gender dysphoria, and human immunodeficiency virus (HIV) pre-exposure prophylaxis (PrEP) and post-exposure prophylaxis (PEP)

- Coverage includes drugs approved by the United States Food and Drug Administration that are prescribed or ordered for off-label use.
- If one or more equivalent versions of an abortifacient product are available (for example, a brand and generic version of the drug), only one version of the drug will be covered with no cost-sharing.
- If an FDA-approved product is not covered but your provider determines it to be appropriate based on medical necessity for your particular circumstances, it will be covered without cost-sharing.
- If a drug is not covered, your provider may request an exception as described in the section **"How do I request a non-formulary exception?"**
- Drugs will be covered with no deductible, coinsurance, copayment, or any cost-sharing requirement except to the extent that coverage would disqualify a high-deductible health plan (HDHP) from eligibility for a health savings account.

Coverage of preventive health services

Preventive health drugs are select drugs required by law to be covered at no charge to members in select plans and include:

- Evidence-based items or services that have in effect a rating of "A" or "B" in the current recommendations of the United States Preventive Services Task Force;
- Immunizations that have in effect a recommendation from the Advisory Committee on Immunization Practices of the Centers for Disease Control and Prevention with respect to the individual involved;
- Evidence-informed preventive care for infants, children, and adolescents, provided for in the comprehensive guidelines supported by the Health Resources and Services Administration; and
- Additional preventive care with respect to women as provided for in comprehensive guidelines supported by the Health Resources and Services Administration

Orally administered cancer medications

Any cost-sharing, prior authorization, step therapy, quantity limitations or other treatment limitations in place for prescribed, orally administered cancer medications are no more restrictive than those applied to intravenously injected or administered cancer medications covered by the health product.

What is the difference between brand-name and generic medications?

Generic medications contain the same active ingredients (what makes the medication work) as brand-name medications, but they often cost less. Once the patent for a brand-name medication ends, the FDA can approve a generic version with the same active ingredients. Except where prohibited by law, if you choose a brand-name medication after a generic version is available, you may pay the brand-name copayment plus the cost difference between the brand-name and generic medication.

Over-the-counter (OTC) medications An OTC medication may be the right treatment option for some conditions. Talk to your doctor about available OTC options. Even though these medications may not be covered by your pharmacy benefit, they may cost less than a prescription medication.

What if my doctor writes a brand-name prescription?

If your doctor gives you a prescription for a brand-name medication, ask if a generic equivalent or lower-cost option is available and could be right for you. Generic medications are usually your lowest-cost option.

What are my pharmacy options for filling a prescription?

Health Alliance uses the Optum Rx pharmacy network, which allows you to fill your prescription at any of the participating retail pharmacies. This includes most U.S. chain pharmacies and many independent pharmacies. To find a participating pharmacy near you, visit HealthAlliance.org or call the Customer Service number on your member ID card.

Can I use a mail order pharmacy?

For medications you take regularly, such as for a chronic or long-term medical condition, you may be able to save time and money by receiving a 100-day supply through Optum® Home Delivery or a 90-day supply by using a network retail pharmacy. Visit www.optumrx.com to get started.

What if I am taking a specialty medication?

Specialty medications are for rare or complex medical conditions. They are oral or injectable medications that can require special administration, training, or clinical monitoring. Specialty medications are limited to up to a 30-day supply and many require prior authorization for coverage. Most specialty medications must be filled at a specialty pharmacy. For help with finding a specialty pharmacy or for more information on how to get started with filling a specialty medication, visit HealthAlliance.org or call the Customer Service number on your member ID card.

How do I request a prior authorization?

If your medication requires prior authorization (PA) or a step therapy exception, your doctor can fax a completed PA form (available at HealthAlliance.org/Pharmacy) to Health Alliance at 1-217-902-9798 or submit a prior authorization via the provider portal. Should you or your doctor need additional

information on how to request PA, please call the number on your member ID card. Once your doctor's request is received, we will notify your doctor of our decision within 72 hours. If Health Alliance fails to respond to a completed PA request within 72 hours of receiving a non-urgent request and 24 hours of receiving a request based on exigent circumstances, the request is deemed approved.

For all drugs except for benzodiazepines, Schedule II narcotic drugs, and maintenance medications to treat a chronic or long-term condition, prior authorization approval will be valid for the lesser of six months, the length of treatment determined by the covered individual's prescribing provider, or until your plan is renewed. For maintenance medications to treat a chronic or long-term condition, a prior authorization approval will be valid for the lesser of 12 months or the length of treatment determined by your prescribing provider.

How do I request a step therapy exception?

In some cases, our plan requires you to first try certain medications to treat your medical condition before we will cover another drug for that condition. This is called step therapy. The required first step medication or preferred drug is a proven, cost-effective medication. Unless an exception is made, one or more preferred medications must be tried before progressing to a drug that is subject to step therapy. A request for an exception to a step therapy requirement may be submitted by your doctor in the same manner as a request for PA. If a request for step therapy exception is denied, you or your doctor may appeal the denial. The denial documents provide more information on the appeal rights and procedures. Step therapy will not be required under the following circumstances: A) If the preferred drug is contraindicated; B) If you have already tried and failed or could not tolerate the preferred drug(s) while on your current or previous health insurance; C) You are already taking a drug that is subject to step therapy upon enrollment in your Health Alliance plan.

The formulary gives you choices so you and your doctor can determine your best course of treatment. In this formulary, a drug is listed alphabetically by its brand and generic names in the therapeutic category and class to which it belongs. Brand-name medications are shown in UPPERCASE (for example, CLOBEX) and generic medications in lowercase (for example, clobetasol).

The generic drug name for a brand name drug is included after the brand name in parentheses and all bold and italicized letters. If a generic equivalent for a brand name is both available and covered, the generic drug will be listed separately from the brand name in all bold and italicized lowercase letters.

If a generic drug is marketed under a proprietary, trademark protected brand name, the brand name will be listed in all capital letters after the generic name in parentheses and regular typeface with first letter of each word capitalized.

Brand drug example:		
SOVALDI TABS 200 MG ***(sofosbuvir)***	4	PA; SP; QL (30 day supply per 1 fill)
Generic drug example:		
lisinopril oral tablet 10 mg, 2.5 mg, 20 mg, 30 mg, 40 mg, 5mg	1	
Generic drug marketed under a proprietary brand name example:		
[Ethynodiol Diacet & Eth Estrad] ZOVIA 1/35E (28) TABS 1-35 MG-MCG	1	PV

Tier information

Using lower tier or preferred medications can help you pay your lowest out-of-pocket cost. Review your Summary of Benefits and Coverage (SBC) for specific cost-sharing amounts for each tier. Your plan may have multiple or no tiers. Please note:

- If you have a high-deductible plan, the tier cost levels will apply once you hit your deductible.
- If the pharmacy's retail price for a prescription drug is less than your applicable copayment or coinsurance amount, you will not be required to pay more than the retail price.

Drug Tier	Drug Tier Description	Helpful Tips
Preventive (PV)	**Brands and generics used for preventive care**	No out-of-pocket cost. Deductible does not apply.
Tier 1	**Preferred generics**	Lowest out-of-pocket cost generic drugs, generic drugs for substance use disorder, some brand drugs.
Tier 2	**Non-preferred generics**	Most generic drugs. Higher out-of-pocket cost than tier 1.
Tier 3	**Preferred brands**	Lower cost brand drugs, brand drugs with narrow therapeutic index, brand drugs for substance use disorder.

Tier 4	**Non-preferred brands**	Many tier 4 drugs have lower-cost options in tiers 1, 2, or 3.
Tier 5	**Preferred specialty**	Specialty medications that require special handling or clinical monitoring. May be limited to a specialty pharmacy. May require administration in provider's office or infusion center.
Tier 6	**Non-preferred specialty**	Higher cost specialty medications that require special handling or clinical monitoring. May be limited to a specialty pharmacy. May require administration in provider's office or infusion center. Many Tier 6 drugs have lower-cost options in Tier 5.
General Medical (GM)	**Medical benefit**	Provided and administered in a doctor's office or hospital and not covered by the pharmacy benefit.

Drug list Information

In this drug list, some medications are noted with letters next to them to help you see which ones may have coverage requirements or limits. Your benefit plan determines how these medications may be covered for you.

AL	**Age Limit** – Based on government or manufacturer guidelines, these medications are only covered for certain age groups.
Brand Penalty Applies – Because a generic equivalent to the brand drug is available, you will be asked to pay your copay plus the difference in cost between the generic and brand drug.	
GD*	**Gender Dysphoria** – These medications may be covered at $0 under your specific plan. Please check your benefit plan documents.
IC*	**Insulin Cap** – The total amount that you will be required to pay for a 30-day supply of covered prescription insulin will not exceed $35. Does not apply for all plans. Please check your benefit plan documents.
PA	These medications may be covered as $0 preventive care if you meet the guidelines based on your plan. Does not apply for all plans. Please check your benefit plan documents.
PV	**Preventive** – These medications are covered at $0 under preventive benefit.
PV*	**Preventive** –These medications may be covered as $0 preventive care if you meet the guidelines based on your plan. Does not apply for all plans. Please check your benefit plan documents.
QL	**Quantity Limit** – Medication may be limited to a certain quantity.

Specialty Medical – Specialty medication that is administered in provider's office or infusion center and covered only under the medical benefit.	
ST	**Step Therapy** – Trial of lower-cost medication(s) is required before a higher-cost medication can be covered.

Definitions

Allowed amount is the maximum amount on which the health insurance issuer bases its payment for a covered health care service. This may be called eligible expense, payment allowance, or negotiated rate. If your health care provider charges more than the allowed amount and is not part of the provider network, you may have to pay the difference.

Brand name drug is a drug that is marketed under a proprietary, trademark protected name. The brand name drug must be listed in all capital letters.

Coinsurance is a percentage of the cost of a covered health care service, which you are responsible to pay. The cost of the covered health care service is generally deemed to be the allowed amount, which may differ from the retail price that you would pay for the same service without using insurance. Typically, coinsurance does not apply until after you have met the deductible, unless the health insurance issuer has waived or lowered the deductible for the health care service in question.

Copayment is a fixed dollar amount that you pay for a covered health care service. Typically, a copayment does not apply until after you have met the deductible, unless the health insurance issuer has waived or lowered the deductible for the health care service in question.

Covered individual is an individual enrolled in, subscribed to, or insured under a health product, whether directly or as a dependent or beneficiary. "Covered Individual" may also be referred to as "Member" throughout this document and other plan materials.

Deductible is the amount you pay for covered health care services before your health product begins payment for all or part of the cost of the health care service under the terms of coverage. If your health product has a deductible, it may have either one deductible or separate deductibles for medical benefits and drug benefits. For some health care services, such as preventive services, the health insurance issuer might waive or lower the deductible to pay for costs of the health care service from the first dollar of coverage, but this tends not to happen for most other covered services.

Drug Tier is a group of drugs that corresponds to a specified cost sharing tier in the health product's drug coverage. The tier in which a drug is placed determines your portion of the cost for the drug.

Exception request is a request for coverage of i) a nonformulary drug, ii) a drug being removed from the formulary, iii) a quantity of a drug above a quantity limit, or iv) a drug that is subject to a step therapy requirement. If you, your designee, or your attending or prescribing health care provider submits an exception request for coverage of a drug, the health insurance issuer must cover the drug when the drug is determined to be medically necessary to treat your condition.

Exigent circumstances are when you are suffering from a health condition that may seriously jeopardize your life, health, or ability to regain maximum function, or when you are undergoing a current course of treatment using a nonformulary drug.

Formulary is the complete list of drugs preferred for use and eligible for coverage under a health product, and includes all drugs covered under the outpatient or pharmacy drug benefit of the health product. Formulary is also known as a drug list or prescription drug list.

Generic drug is the same drug as its brand name equivalent in dosage, safety, strength, how it is taken, quality, performance, and intended use. A generic drug is listed in bold and italicized lowercase letters.

Non-formulary drug is a drug that is not listed on the health product's formulary as a covered drug, but may become eligible for coverage under an exception request.

Out-of-pocket cost is copayments, coinsurance, and the applicable deductible, plus all costs for health care services that the health product does not cover.

Prescribing provider is a health care provider authorized to write a prescription to treat your health condition.

Prescription is an oral, written, or electronic order by a prescribing provider for you that contains the name of the drug, the quantity of the drug, the date of issue, the name and contact information of the prescribing provider, the signature of the prescribing provider if the prescription is in writing, and if requested by you, the health condition or purpose for which the drug is being prescribed.

Prescription drug is a drug that is prescribed by your prescribing provider and requires a prescription under applicable law.

Prior Authorization is a health product's requirement that you or your prescribing provider obtain the health insurance issuer's authorization for a drug before the health product will cover the drug. The health insurance issuer must grant a prior authorization when it is medically necessary for you to obtain the drug.

Step therapy is a process specifying the sequence in which different prescription drugs for a given health condition are medically appropriate for you. The health insurance issuer may require you to try one or morSe drugs to treat your health condition before the health insurance issuer will cover a particular drug for the condition pursuant to a step therapy request. If your attending or prescribing provider submits a request for step therapy exception, the health insurance issuer must make exceptions to step therapy when the criteria are met.

phytonadione injection solution 1 mg/0.5ml, 10 mg/ml	GM	
phytonadione oral tablet 5 mg	2	
vitamin k1 injection solution 1 mg/0.5ml, 10 mg/ml	GM	

Effective December 1, 2025
Tier 1: Preferred generics; Tier 2: Non-preferred generics; Tier 3: Preferred brands; Tier 4: Non-preferred brands; Tier 5: Preferred specialty; Tier 6: Non-preferred specialty; GM: General Medical -- provided and administered in a doctor's office or hospital and not covered by the pharmacy benefit; AL: Age Limit -- Based on government or manufacturer guidelines, these medications are only covered for certain age groups; Brand Penalty Applies: Because a generic equivalent to the brand drug is available, you will be asked to pay your copay plus the difference in cost between the generic and brand drug; GD*: Gender Dysphoria -- These medications may be covered at $0 under your specific plan. Does not apply for all plans. Please check your benefit plan documents; IC: Insulin Cap -- The total amount that you will be required to pay for a 30-day supply of covered prescription insulin will not exceed $35. Does not apply for all plans. Please check your benefit plan documents; PA: Prior Authorization – Your doctor is required to provide additional information to determine coverage; PV: Preventive – These medications are covered at $0 under preventive benefit; PV*: Preventive – These medications may be covered as $0 preventive care if you meet the guidelines based on your plan. Does not apply for all plans. Please check your benefit plan documents; QL: Quantity Limit – Medication may be limited to a certain quantity; Specialty Medical: Specialty medication that is administered in provider's office or infusion center and covered only under the medical benefit; ST: Step Therapy-- Trial of lower-cost medication(s) is required before a higher-cost medication can be covered.
