

Breast Cancer Screening Tip Sheet

What is the CMS Star Rating Program?

CMS uses a five-star quality rating system to measure the experiences Medicare beneficiaries have with their health plan and healthcare system – the Star Rating Program. Health plans are rated on a scale of 1 to 5 stars, with 5 being the highest. These ratings are then published on the Medicare Plan Finder at medicare.gov to help consumers compare health plans more easily.

Measure Description

Weight: 1

This measure shows the percent of female plan members aged 52-74 who had a mammogram during the past two years.

Measure Source

- Claims
- 1/1 – 12/31

Stars/Quality Specifications

The percentage of women MA enrollees 50 to 74 years of age who had a mammogram to screen for breast cancer. One or more mammograms any time on or between October 1st two years prior to the measurement year and December 31st of the measurement year.
